GENERAL INFORMATION:
APPLICANT: Ribozyme Pharmaceuticals, Inc.
APPLICANT: Rosmaugh, Kathy
APPLICANT: McSwiggen, Jim
TITLE OF INVENTION: METHOD AND REAGENT FOR THE TREATMENT OF ASTHMA AND ALLERGIC CC
TITLE OF INVENTION NUMBER: US/10/230,006
CURRENT FILING DATE: 2002-11-18
PRIOR APPLICATION NUMBER: US 60/315,315
PRIOR APPLICATION NUMBER: US 60/315,315

Sequence 531, Application US/09864785

Sequence 531, Application US/09864785

Patent No. US20020177568A1

GENERAL INFORMATION:
PAPPLICANT: Ribozyme Pharmaceuticals, Inc.
APPLICANT: Stinchcomb, Dan
APPLICANT: Draper, Ken

APPLICANT: Draper, Ken

TITLE OF INVENTION: Enzymatic Nucleic Acid Treatment of Diseases or Conditions Re:
TITLE OF INVENTION: Levels of NP-Kappa B
FILE REFERENCE: 400/022 (WEBBO0-812-D)

CURRENT FILING DATE: 2001-05-23

NUMBER OF SEQ ID NOS: 3929

SOUTHWARE: PatentIn version 3.0

SEQ ID NO 531

LENGTH: 17
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     FEATURE:

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   à
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           d
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Sequence 426, Application US/09504231A

Sequence 426, Application US/09504231A

Patent No. US20020013458A1

GENERAL INFORMATION:

APPLICANT: Blatt, Liawrence

APPLICANT: Roberts, Beth

APPLICANT: Roberts, Beth

APPLICANT: Roberts, Dennis

TITLE OF INVENTION: ENZYMATIC NUCLEIC ACID TREATMENT OF DISEASES OR CONDITIONS RELATE

TITLE OF INVENTION: HEPATITIS C VIRUS INFECTION

TITLE OF INVENTION: HEPATITIS C VIRUS INFECTION

TITLE OF INVENTION: HEPATITIS C VIRUS INFECTION

TITLE OF INVENTION WHERE: US/09/504,231A

CURRENT APPLICATION NUMBER: US/09/504,553

PRIOR FILING DATE: 1999-03-23

PRIOR FILING DATE: 1999-02-24

PRIOR FILING DATE: 1998-09-18

PRIOR FILING DATE: 1998-09-18

PRIOR FILING DATE: 1998-04-27

NUMBER OF SEQ ID NOS: 3242
                                                                                                                                                                                                                                                                                                                                                                                                                                                               APPLICANT: Kaniec, Eric B.
APPLICANT: Gamper, Howard B.
APPLICANT: Gamper, Howard B.
APPLICANT: Raice, Michael C.
ITILE OF INVENTION: Targeted Chromosomal Genomic Alterations with Modified Single
TITLE OF INVENTION: Stranded Oligomucleotides
FILE REPERENCE: NaPro-4COM
CURRENT APPLICATION NUMBER: US/10/261,185
CURRENT FILING DATE: 2001-09-27
FRIOR FILING DATE: 2001-03-27

Sequence 495, Application US/10440850

Publication No. US20030207837A1

GENERAL INFORMATION:
APPLICANT: Ribozyme Pharmaceuticals, Inc.
APPLICANT: Stinchcomb, Dan
APPLICANT: Stinchcomb, Dan
APPLICANT: McSwiggen, Jim
TITLE OF INVENTION: Method and Reagent for the Induction of Graft Tolerance and Rever
TITLE OF INVENTION: Immune Responses
FILE REFERENCE: 250/130 (MBHB00-900-A)
CURRENT APPLICATION NUMBER: US/10/440,850
CURRENT PILING DATE: 2000-08-28
FRIOR FILING DATE: 2000-08-28

GENERAL INFORMATION:

GENERAL INFORMATION:

TITLE OF INVENTION: COMPUTER SYSTEM FOR DESIGNING OLIGONUCLEOTIDES USED IN TITLE OF INVENTION: BIOCHEMICAL METHODS

TITLE OF INVENTION: BIOCHEMICAL METHODS

TITLE OF INVENTION: BIOCHEMICAL METHODS

CURRENT APPLICATION NUMBER: US/10/398,445

CURRENT FILING DATE: 2004-01-23

PRIOR APPLICATION NUMBER: PCT/US01/31037

PRIOR APPLICATION NUMBER: 60/237,383

PRIOR FILING DATE: 2000-10-04
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 ;

GENERAL INFORMATION:
APPLICANT: NGUYEN, Khue Vu
TITLE OF INVENTION: RT-PCR-BASED CLONING OF THE HUMAN BETA-AMYLOID PRECURSOR PROTEIN
TITLE OF INVENTION: GENE AND THE CONSTRUCTION OF ITS EXPRESSION PLASMIDS
FILE REFERENCE: APP Expression Plasmids
CURRENT APPLICATION NUMBER: US/10/777,592
CURRENT APPLICATION DATE: 2004-02-13
NUMBER OF SEQ ID NOS: 3
SOFTWARE: Patentin version 3.2
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                ;
